Power Your Gateway

1

**Plug your Gateway into a power outlet** with the provided power cord and wait until the LED on the Gateway turns RED. If your Gateway is already plugged in, unplug and then plug it back in.

Daily Measurements — 6

Use your pill bottle like normal and take your medication as instructed by your healthcare provider.

When in range of the Gateway, the PatchCap will connect and transmit open and close events to your care provider. Your gateway will turn from red to green if a medication event was sent that day.
