3
Press Button

Press the power button on the oximeter. **Keep** your finger in the oximeter for 20 seconds

4
Wait 20 seconds

Once the measurement has been completed, the device will then lock the reading and begin to transmit the data over the cell network.

5
Measurement Taken

"**Success**" will display when the reading has been transmitted. When "**FAILED**" is shown, the reading will be saved and the device will try and send again on your next measurement.

Success
