XK 300 Essence
Quick Start Guide

Transmit Data to your Provider · 7

Every 6 hours, the XK device will automatically connect to the Tenovi Gateway and transmit data to your provider. The LED will turn RED at midnight and switch to GREEN once a measurement has been successfully transmitted.
LED turns red at midnight

Measurement Successful

LED Status Check · 8

- ● Normal Operation — > No issue
- ○ Booting — > Wait a moment
- ● Communication failed — > Reconnect the power cable
- ● Cable Connection failed — > Reconnect the XK300 Essence cable
Power cable ········ XK300 Essence cable

Power Your Gateway · 1

Plug your Gateway into a power outlet with the provided power cord and wait until the LED on the Gateway turns RED.
Position your body · 2

Using the measuring tape, **mark 60 centimeters above** the mattress. If you're sharing the bed, place the sensor near the edge on your side. If there's only one person in bed, **place the sensor at the center of the bed.**
