

Common Medications for **MSK** conditions

Tenovi Pillbox

The Tenovi Pillbox enables healthcare providers to track medication adherence for musculoskeletal (MSK) and respiratory conditions using medical devices that collect non-physiological data. Providers can bill MSK under remote therapeutic monitoring (RTM) CPT 98977 and respiratory under CPT 98976, while CPT 98980 and 98981 are available for RTM treatment management services.

Common Medications for Respiratory Conditions

Non-Steroidal Anti-Inflammatory Drugs (NSAIDs):

- Naproxen (Aleve, Naprosyn)
- Diclofenac (Voltaren, Cataflam)
- Celecoxib (Celebrex)
- Aspirin (Bayer, Bufferin)

Analgesics:

- Acetaminophen (Tylenol)
- Paracetamol (Panadol – internationally known)

Muscle Relaxants:

- Cyclobenzaprine (Flexeril)
- Baclofen (Lioresal)
- Methocarbamol (Robaxin)
- Tizanidine (Zanaflex)
- Carisoprodol (Soma)

Corticosteroids:

- Prednisone (Deltasone)
- Methylprednisolone (Medrol)
- Dexamethasone (Decadron)
- Hydrocortisone (Cortef)

Disease-Modifying Anti-Rheumatic Drugs (DMARDs):

- Methotrexate (Trexall, Otrexup)
- Hydroxychloroquine (Plaquenil)
- Sulfasalazine (Azulfidine)
- Leflunomide (Arava)

Biologic Agents

- Infliximab
- Etanercept

Topical Analgesics

- Capsaicin cream
- Diclofenac gel

Opioids

- Oxycodone
- Hydrocodone

Bisphosphonates

- Alendronate

Medications for Respiratory Conditions

Leukotriene Modifiers

- Montelukast

Expectorants

- Guaifenesin

Antitussives

- Dextromethorphan

Antihistamines

- Diphenhydramine
- Loratadine

Decongestants

- Pseudoephedrine

Antibiotics (for bacterial respiratory infections)

- Amoxicillin
- Azithromycin

Mucolytics

- Acetylcysteine

Monoclonal Antibodies

- Omalizumab
- Dupilumab

These lists include many common medications available for musculoskeletal and respiratory conditions. There may be generic or branded versions for each.
